

CINETECH CHRONICLES

Lights. Camera. Innovation.

Event Overview

Every era finds its storytellers, and this is the age of technology. CineTech Chronicles invites students to pick up a camera and turn the pulse of innovation into cinema — AI, robotics, space, sustainability, digital revolutions, or any idea reshaping the world we live in. Whether it's a gripping sci-fi short, a documentary on emerging tech, or a quiet social story about life in the digital age, this is a stage for films that speak to the thinkers of tomorrow. Bring your vision. Bring your team. Let the story do the talking.

Theme & Inspiration

Every film must revolve around Technology, Innovation, or Scientific Concepts. Interpret it however you like — fiction, documentary, satire, drama — as long as the tech thread runs through it. A few directions to spark ideas:

- AI in everyday life — companion, disruptor, or something in between
- Futuristic societies and the world's technology could build
- Student-led innovation and problem-solving through tech
- Ethical hacking, cybersecurity, and digital trust
- Climate tech and sustainability-driven solutions
- Any other original take on the Tech Era — surprise us

Eligibility Criteria

- Open to students from any college, university, or department.
- Participation is team-based: minimum 1, maximum 4 members per team.
- Each team may submit only one entry.
- Prior registration is mandatory.

Film Specifications

Parameter	Requirement
Duration	3–8 minutes, including opening and closing credits
Team Size	Minimum 1 — Maximum 4 members
Language	Any language, but English subtitles are mandatory
File Format	MP4 or MOV
Quality	Full HD (1080p) preferred
Submission Mode	[Google Drive link/ Email]

Rules & Regulations

- Films must be 100% original — concept, script, and execution.
- No use of unlicensed music, stock footage, or third-party copyrighted material of any kind.
- Any music, footage, or assets used must be either self-created, royalty-free, or properly licensed, with credit given in the closing titles.
- No offensive, abusive, or discriminatory content of any kind.
- Political, religious, or otherwise sensitive content unrelated to technology is not permitted.
- Submissions close on [insert date & time]. Late entries will not be accepted under any circumstances.
- By submitting, teams confirm they hold full rights to all content used and grant organizers permission to screen the film at the event.

Evaluation / Judging Criteria

Every film is scored by the judging panel against five weighted criteria:

Criteria	What We're Looking For	Weightage
Concept & Originality	A fresh, authentic idea that hasn't been done to death	25%
Storytelling & Script	A narrative that pulls the viewer in and pays off by the end	25%
Technical Execution	Cinematography, sound, editing, and overall production quality	20%
Tech/Innovation Relevance	How meaningfully the film engages with technology or science	20%
Presentation & Impact	Polish, pacing, and the lasting impression it leaves	10%
