

THE CHEMICAL CONSPIRACY: ESCAPE ROOM2.0

Event Guidelines

Event Description:

Step into the role of a detective in a thrilling chemistry- based escape room where every clue leads closer to solving a mysterious crime again. Time is running out-every second counts.Will your team unlock the secrets of Project ALCHEMIST and save years of scientific discovery, or will the formula be lost forever?

Work together with your team to crack codes, identify compounds, balance reactions, interpret laboratory clues and unlock each level of the investigation. Every puzzle tests your observation, logical thinking, teamwork and chemistry knowledge.

Eligibility Criteria:

- Open to 11th&12th standard students and undergraduate students of all disciplines.
- At least one team member should have basic and applied understanding of chemistry.
- Every participating team must have 3 members.
- Each participant may register as a member of only one team.
- Participants must report to the venue 10-15 minutes before the allotted time slot.

Rules &Regulations:

1. Participation Guidelines:

1. Each team must consist of 3 members.
2. A participant can join only one team.
3. Teams must register before the given deadline.
4. Once registered, no changes in team members are allowed.
5. Electronic gadgets are prohibited.
6. All participants must follow safety and discipline protocols.

2. Rules for Participants:

- All puzzles must be solved using the clues and materials provided inside the room. No external resources are permitted.
- The use of **mobile phones, smartwatches, calculators or any electronic devices** during the game is strictly prohibited.
- Participants must not damage, force open, or tamper with locks, props, laboratory equipment, or any other materials provided.
- If a team requires assistance, they may request a **hint** from the game master. (The number of hints may be limited or may result in a time penalty, as decided by the organizers.)
- Participants must follow all safety instructions and handle laboratory props with care.
- Any form of unfair means, misconduct or sharing of puzzle solutions with other teams will lead to immediate disqualification

3. Evaluation Criteria:

Criteria	Marks/Weightage
Accuracy in solving chemistry puzzles	30
Logical reasoning and problem-solving	25
Teamwork and communication	20
Time taken to complete the challenge	15
Adherence to rules and laboratory safety	10
Total	100

4. Tie-Breaking Criteria:

In the event of a tie, the following will be considered in order:

- Fastest team to complete the challenge.
- Team solving the challenge with the fewest hints.
- Team with the highest accuracy in solving chemistry puzzles.
- Decision of the judges will be considered as final.
